4th Quarter Review

Notwithstanding increased inflation due to higher international oil prices, increased import costs, and supply chain shortages, the Bahamian economy continued to recover from the fallout of hurricane Dorian and the COVID-19 pandemic. This trend is expected into Q1 2023 as the tourism and construction industries impact the economy positively.

During Q4, the net asset value (NAV) per share rose to \$1.8827. The Fund began purchasing Government Treasury Bills which contributed to its short-term interest income during the fourth quarter of 2022. The strong performance of local equities also added to positive returns in the Fund, as it returned a gain of 4.42% during 2022.
